

## Fuel Surcharge Schedule

Fuel Surcharge (FSC) is an important component of the cost of transportation. The price of highway diesel fuel continually varies depending on market economics and has an immediate effect on over-the-road freight rates. Patriot was the first logistics company in Canada to provide customers with a fixed fuel surcharge schedule to allow you to better control this variable component. When fuel prices are high, Patriot applies a fuel surcharge, on a percent of linehaul charges. When fuel prices are low, Patriot reduces the fuel surcharge, on a percent of linehaul charges.

Patriot adjusts its fuel surcharge weekly, based on the U.S. National Average Fuel Index of the previous Monday. The fuel index, published by the U.S. Energy Information Administration, is available on Patriot's websites' Resources menu entitled U.S Weekly Diesel Fuel Prices section. Patriot customers have the flexibility of being quoted rates on an all-inclusive of fuel surcharge or based on a percent of linehaul charges as follows:
